

## Draw a simple plane - step by step tutorial

This plane is very easy to draw with the help of the instructions. Step by step your plane takes shape.

⚠ You need a pencil, a black drawing pen and different colors for this. Use the eraser to erase the auxiliary lines later.

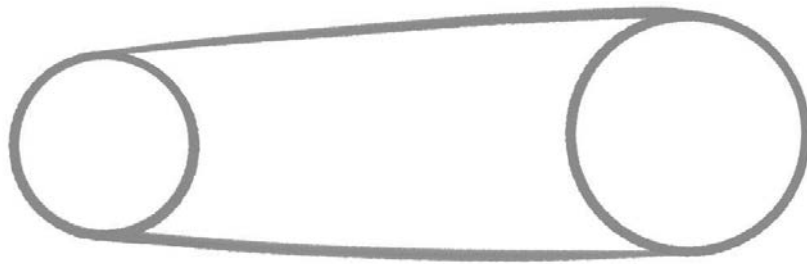

1

## Step 1: Draw circles

Use the pencil to draw a smaller circle on the left and a slightly larger circle on the right. You can see how big the distance must be in the template.

2

## Step 2: Fuselage of the plane

You connect the two circles with lines running up and down to form a body.

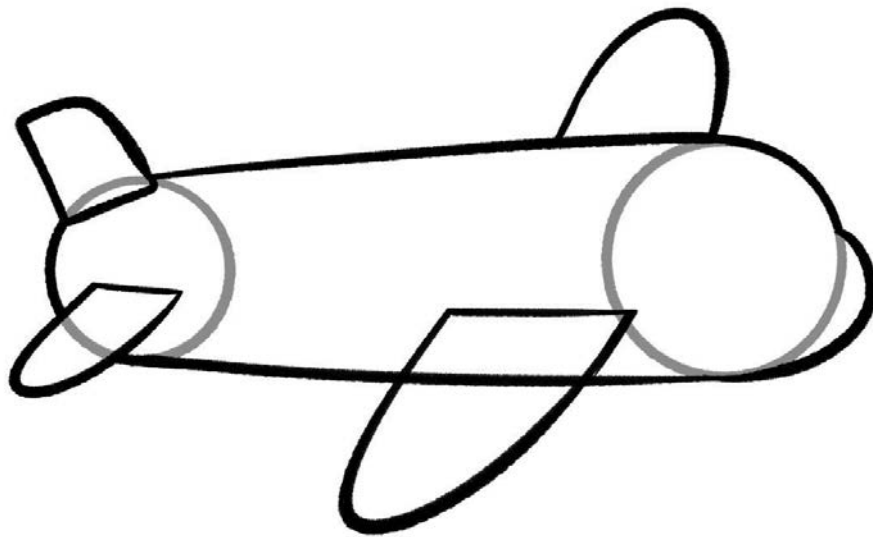

3

### Step 3: Tail fin, bow and permanent

Use the pencil to trace the contours. On this occasion you draw the upright tail fin. This "originates" from the left circle. The front circle you give a "snout" - the nose of the plane.

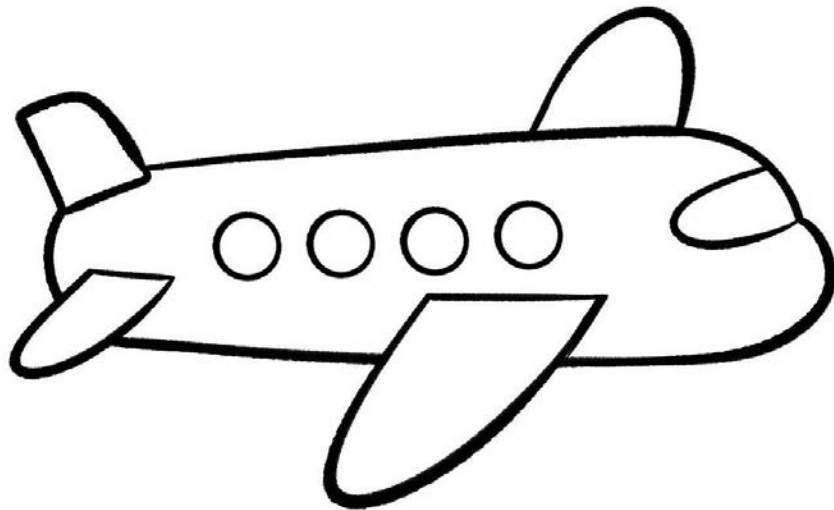

4

## Step 4: Wings and Elevator

Draw the transverse elevator below the tail fin. In addition, your plane gets wings. You can find the exact position on the template.

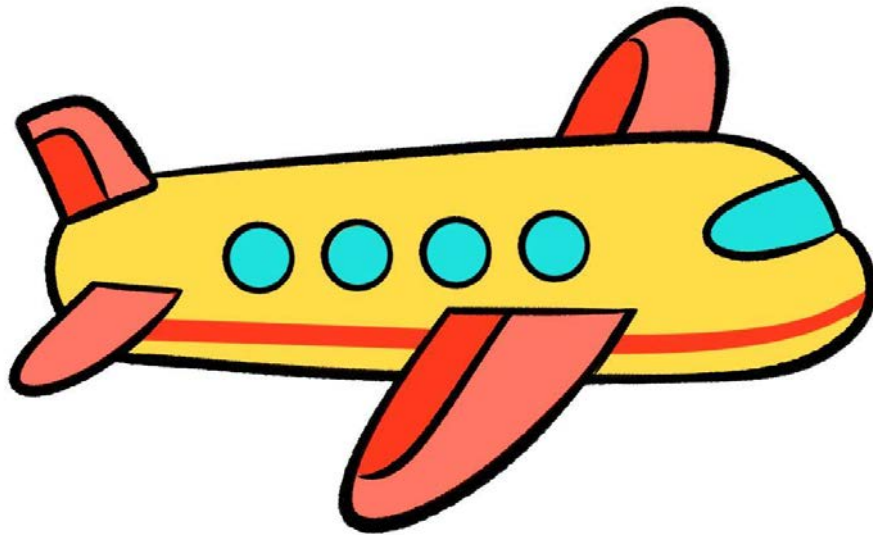

5

### Step 5: Window and auxiliary lines

With the pencil you draw all remaining contours. You paint windows in the cockpit and on the side of the plane. Then you remove all auxiliary lines.

6

## Step 6: Color

in You color in your plane. In the template, the plane is yellow and red with blue windows. You can choose the same colors or choose different ones.
