

Ship drawing - step by step tutorial

A ship, more precisely a sailing ship, embodies the dream of tranquility and luxury on the sea. To draw such a ship, you need a loose stroke, because although it is a clearly structured object, the soft and somewhat curved lines of a sailing ship are captivating.

With these instructions you can draw a dreamlike ship step by step and set sail in your mind. Use the template, for example, for a beautiful drawing for a birthday or as a cool wall tattoo.

⚠ We recommend a pencil, an eraser, an erasable drawing pen and matching colors according to your preferences for this tutorial.
